

### Missouri Students Receiving Seeing Stars Instruction Make Significant Improvements in Reading

Seeing Stars for Phonemic Awareness, Reading, and Spelling (SI)

#### PROFILE:

Number of Students: 32

Grade Levels: 6th-9th

Lindamood-Bell Programs Implemented: Seeing Stars®

Outcome Measures:

- Symbol Imagery Test
- Lindamood Auditory Conceptualization Test-3rd
- Woodcock Reading Mastery Test-Revised (word attack)
- Wide Range Achievement Test-4th (reading and spelling)
- Gray Oral Reading Tests-4th (rate, accuracy, fluency, and comprehension)

#### BACKGROUND:

Caruthersville Middle School in Caruthersville, Missouri, serves a large percentage of students who are at-risk of reading failure. During the 2010-11 school year, Caruthersville implemented Lindamood-Bell® instruction to address the specific needs of this student population. This project was funded by a School Improvement Grant. Thirty-two students received an average of 200 hours of Seeing Stars instruction to develop symbol imagery for reading. Instruction was delivered by Caruthersville teachers who received professional development in the Lindamood-Bell programs. Student gains were measured with a battery of reading assessments.

*Average Standard Score Changes*

■ Small (<3.0) 
 ■ Medium (3.0-4.5) 
 ■ Large (>4.5)

*Pre- and Posttest Percentiles*

■ Pre 
 ■ Post

\*Statistically significant ( $p \leq .05$ ).

#### RESULTS:

On average, Seeing Stars students achieved significant improvements in reading. They made large standard score changes on nearly all measures. Additionally, the 42-point percentile increase in phonemic awareness put these students within the normal range (25th-75th percentile). Their pre- to posttest results were statistically significant on all measures. The results of this study illustrate that Lindamood-Bell instruction in the Seeing Stars program leads to improved reading, which is essential to achieving success with school curricula.
