

Comprehension

Results of Students Who Received Comprehension Instruction

Pre- and Posttest Percentiles

Average Standard Score Changes

Summary

Lindamood-Bell Instruction Implemented: Visualizing and Verbalizing

Years: 2008-2017

Average Age: 12

Number of Students: 4,682

Average Hours of Instruction: 99

Results: On average, students who received Visualizing and Verbalizing instruction achieved significant improvements in areas associated with language comprehension. They made large (significant) standard score changes on three of the four measures. Additionally, the 22-point percentile increase in comprehension put these students well within the normal range (25th-75th percentile). Their pre- to posttest results were statistically significant on all measures.
