GIANT PANDAS

can live on only raw, woody bamboo, but
they must eat a lot, just to stay strong.

MARY MCLEOD BETHUNE

As a child of former slaves, Mary once picked up a book, and a child took it away from her, saying she didn't know how to read. *Mary was inspired to learn to read.* She became an educator, a leader in the fight for civil rights, and an advisor to President F. Roosevelt.

"When you develop the sensory input of imagery you change reading behaviors and brain function."
